COUSTICS READYTHEME CUSTOMIZATION

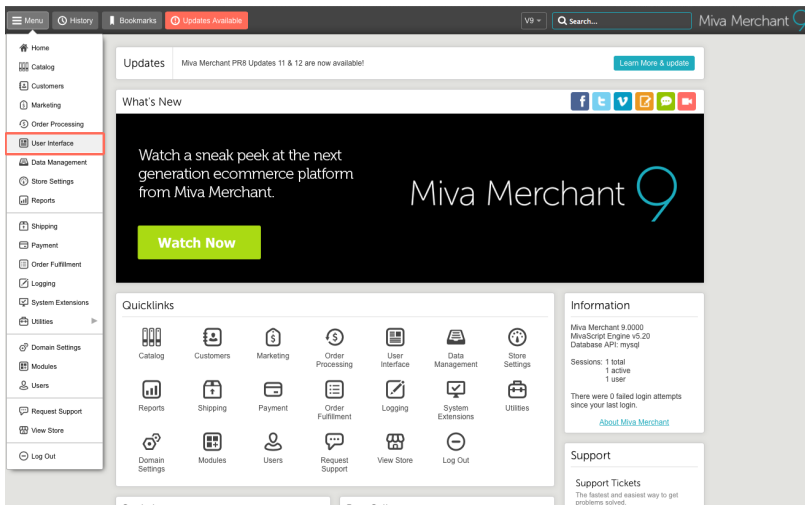

September 2015

If you sign up for a hosting account through Miva, you will be given the opportunity to choose a ReadyTheme in the checkout process and have it professionally installed for you.

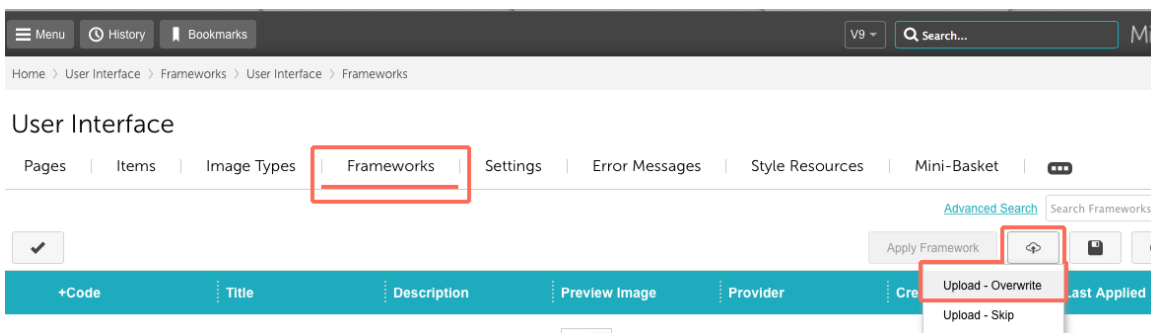

Installing the Coustics ReadyTheme

These instructions are for installing a ReadyTheme to a brand new store. If you have an existing store, please contact support.

1. Got to <http://apps.miva.com/readythemes> and download the theme you want. For this guide we are downloading and installing the Coustic ReadyTheme.
2. Go to your Miva 9 Admin, click on Menu, scroll down and select “User Interface.”

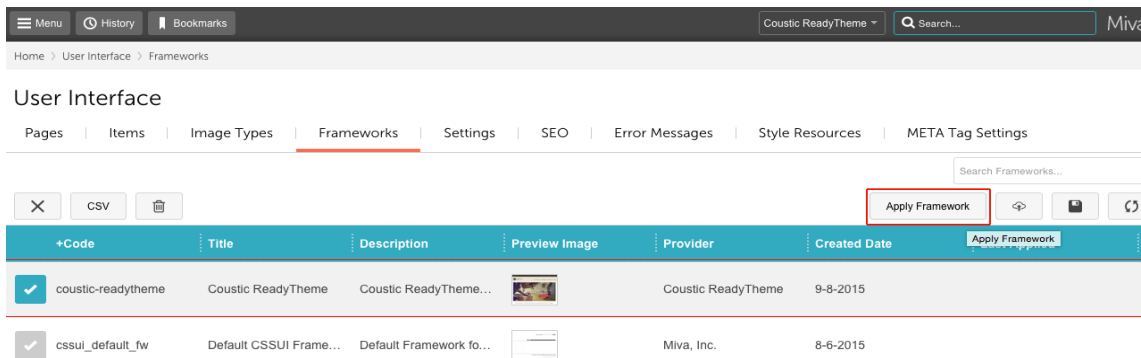

3. Select Frameworks, click on the upload button, select “Upload-Overwrite.”

4. Go to your downloads file, open the readytheme folder, and select the .pkg file, then select “Choose.”

No Date	Size	Kind	Date Modified
 coustic-readytheme.pkg	409 KB	Installer package archive	Today at 2:00 PM
 Coustics R...ization.pdf	2.2 MB	Portable Document Format	Today at 2:00 PM

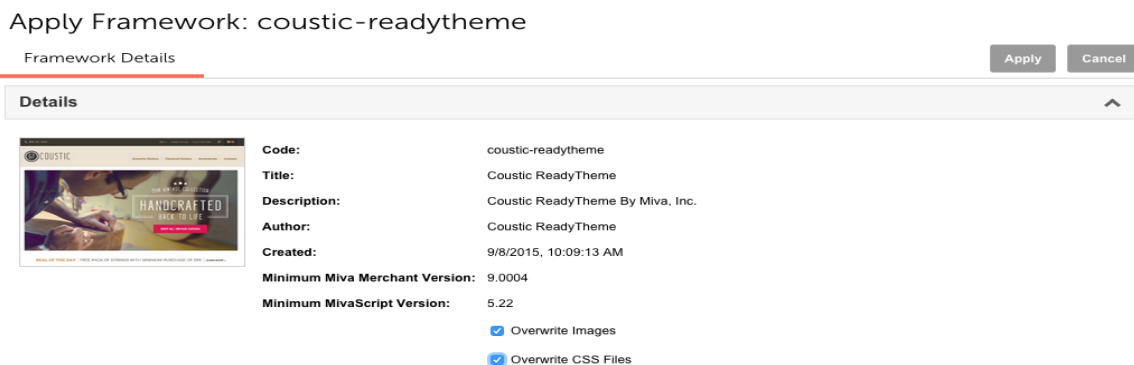

5. Click on your ReadyTheme, Click “Apply Framework.”

The screenshot shows the Miva User Interface Frameworks section. The 'Apply Framework' button is highlighted with a red box. The table below lists the available frameworks.

+Code	Title	Description	Preview Image	Provider	Created Date	Apply Framework
☒	coustic-readytheme	Coustic ReadyTheme	Coustic ReadyTheme...	Coustic ReadyTheme	9-8-2015	
☒	cssui_default_fw	Default CSSUI Frame...	Default Framework fo...	Miva, Inc.	8-6-2015	

6. Click the two boxes, “Overwrite Images” and “Overwrite CSS Files”, then click “Apply.”

The screenshot shows the 'Apply Framework: coustic-readytheme' dialog. The 'Overwrite Images' and 'Overwrite CSS Files' checkboxes are checked. The 'Apply' button is highlighted with a red box.

Apply Framework: coustic-readytheme

Framework Details

Details

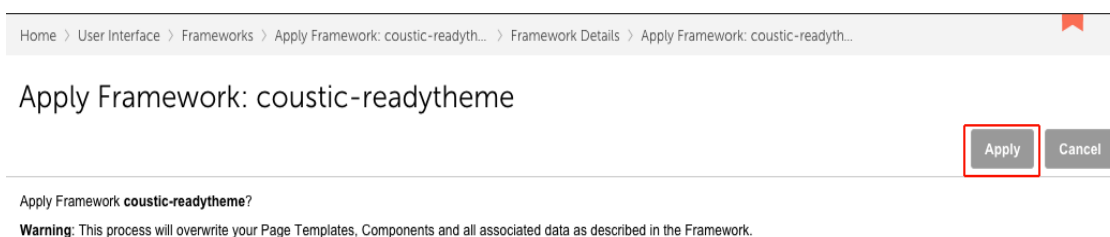

Code: coustic-readytheme

☒ Overwrite Images
☒ Overwrite CSS Files

Apply **Cancel**

7. A secondary warning page will come up, go ahead and hit “Apply” one more time.

The screenshot shows the 'Apply Framework: coustic-readytheme' dialog. The 'Apply' button is highlighted with a red box.

Apply Framework: coustic-readytheme

Apply **Cancel**

Apply Framework **coustic-readytheme**?

Warning: This process will overwrite your Page Templates, Components and all associated data as described in the Framework.

Install Product Image Custom Fields

8. This may or might not need to be done, depending on future updates for this theme. Go to Utilities, Add/Remove Modules and see if “Product Image Custom Fields” is in the “Available Modules” area. If it is, click on the install button. If it’s down below under “Installed Modules” then you can skip to the next step.

Utility Settings

Template Based Batch Reports | Custom Fields | Custom Field Groups | ******* Reset

Available Modules ^

Product Image Custom Fields Version: 9.0000 Provider: Miva Merchant Use this module to enable custom fields for importing images in bulk. For example, you could create Image Types "Front" and "Back" to distinguish front and back images of a product. These custom fields will appear as columns in your product spreadsheet template from Utilities > Import Data. See the Miva Merchant PR8 Reference guide for details on the Additional Images Import feature. Install	Shop As Customer Version: 9.0001 Provider: Miva Merchant The Shop As Customer feature allows you to create or join a session in your online store using a customer's identity. This is useful for helping a customer through the checkout process. Once you have installed the module, you can enable Shop As Customer from the Edit Customer screen. Install
